Karin Russ Teleconference: Integrating Environmental Health into Clinical Practice. Nov 18, 10:00 PST/ 1:00 pm EST. Prenatal exposure to environmental contaminants is associated with a wide range of diseases, both in the neonatal period and later in life. Studies are discovering links between endocrine disrupting chemicals and infertility. While research is uncovering the connections between environmental exposures and health problems, clinicians are beginning to incorporate this information into patient care. Join us for this great discussion of assessment tools, patient education & giving sound advise!
